THIS PAGE IS LONG AND HAS ALL OF THE INFORMATION YOU WILL NEED TO KNOW ABOUT OUR NEW SIZE OF BIG BOY CONNECTORS BEING OFFERED. WE INCLUDED EVERYTHING ON THIS PAGE SO WE WOULD NOT HAVE TO SEND YOU TO A NUMBER OF OTHER PAGES TO GET THE RIGHT INFORMATION. HOPE THIS HELPS YOU IN MAKING AN INFORMED DECISION.

Thanks to the success of our heavy duty Big Boy series 4"x 4" steel/timber framing connectors for building cabins, sheds, shops, barns, homes and a whole host of other do it yourself economical quality shelters. We have invested & developed a new series of bigger steel/timber connectors for larger projects.

The single biggest question we were presented with by a sizeable percentage of the inquiring public was the question "DO YOU MAKE THEM WITH BIGGER SIZED STEEL THAT WILL TAKE BIGGER TIMBERS SO I CAN BUILD MY PROJECT OUT OF THICKER & HEAVIER MATERIAL? With that question being asked by a significant number of inquiry's we went back to the drawing board to be able better to serve our clients.

All Steel Shed Frames is happy to announce that we now fabricate & produce the Big Boy Connectors in 4 additional sizes of steel. The original size of the Big Boy Connector Series we still make with 4" x 4" x ¼" wall square steel and will be known now as the BB-44 series. We still make that size plus we have added 4 additional sizes to accept bigger timbers for the do it yourselfer to build larger, heavier, higher projects.

NEW SERIES & SIZES OF STEEL/TIMBER BIG BOY CONNECTORS OFFERED ARE AS FOLLOWS:

<u>4"X 6"</u> steel is BB-46 – SERIES, <u>4"X 8"</u> steel is BB-48 SERIES- <u>6"X 6"</u> steel is BB-66 SERIES & <u>8"X 8</u> steel is the BB-88 SERIES. All SERIES CONNECTORS are ¾" WALL THICKNESS. THE NEW SIZES OF BB CONNECTORS ACCOMMODATE LIKE SIZE MILLED TIMBERS OR STEEL WITH ½" SMALLER OUTER DIMENSION TO EASILY BUILD STRONGER BUILDINGS.
